ArmorThane

Spray-On Polyurethane and Polyurea Protective Coatings

Thicker. Tougher. Better.

ArmorThane® Withstands Adverse Conditions

- More durable than rubber and plastic
- Flexible in weather conditions from - 62°C to +138°C
- No softening in extreme heat, not brittle in cold
- Stretches up to 3x before breaking
- Waterproof, resists corrosion
- Quick dry, easy application
- Protects high wear areas
- Dents & Scratches Resistant
- Reduce noise and vibration

Proven Safe

- Solvent Free; no VOCs or CFCs
- ArmorThane's sprayed-on coatings are 100% solid polyurethane, so there is no environment hazard.
- Complaint with health regulations for food processing.

ArmorThane® not only waterproofs and protects, it also aids in sound proofing, as well as a temperature insulator and has been specifically formulated as a durable protective coating, ensuring that for years to come your investment will have the best possible protection technology can offer.

ArmorThane Provides The Look You Want

Unique UV Colour coat system for a customized match to any colour you want.

What Does Extra Protection Mean To You?

ArmorThane® sprayed-on industrial grade products protect a variety of surfaces when other coatings or conventional liners don't hold up.
