

Marine Industry Protective Coatings

Coating for the Marine Industry

The goal of marine coatings is safety and protection of both people and property. ArmorThane Polyurethane and Polyurea professionally sprayed products create a tough barrier on a variety of surfaces. These industrial strength coatings block the elements by creating an air tight, waterproof barrier.

Marine Applications

Water covers nearly three-fourths of our world and therefore the range of environmental factors is enormous. Coatings must resist saltwater and constant moisture. They have to withstand the coldest to the hottest climates. Rust, abrasion, floating debris, algae, chemicals and many other threats can damage property and put marine life and people at risk.

Marinas benefit when coatings eliminate splinter injury caused by old wood. Textures and particulates can be applied for slip resistance. Coatings are used to repair or prevent cracking. Here are other areas that benefit from ArmorThane products:

- Marina floors, ramps, stairs
- Encapsulation of dock floats
- Pier pillars, sea walls
- Pleasure craft and cargo ships: decks, floors, hulls
- Cargo lining, holding tanks
- Conveyor equipment

Design Choices

ArmorThane products can be pigmented to a matching color or used as a design accent. If color is important, we offer both UV stable topcoats and aliphatic polymers to prevent fading. Some quick-dry options can incorporate creative designs such as logos.

Mobile Coatings

No longer does the marine climate prevent onsite application. Today, our innovations in chemical development, application processes and mobile equipment allow coating products to be sprayed any time, any place. Unlike many other companies, we build custom trailers to meet your specifications.

ArmorThane has all of the high-pressure equipment and supplies needed to be fast and efficient.

The Most Durable Protective Coatings Available

Beyond Marine Features

Going beyond marine features, our products add protection and beauty to the entire outdoor environment. Covering surfaces of worn out patios, porches, pool decks, walls, walkways, bridges and park pavilions prevents further deterioration and revitalizes valuable landscaping. ArmorThane coatings are even applied to tables, benches, playground equipment, gazebos, bleachers and more.

Safe for All Environments

ArmorThane Polyurea and Polyurethane contain no VOC's or solvents so coatings are not volatile and will not harm the environment. These seamless, waterproof products are safe for people, marine animals and plants. They will not leach into or absorb water or chemicals. Surfaces are easy to clean and gritty material can be added to prevent slipping.

Our wide range of pure and hybrid polymer products and processes allow applicators to spray in warm, humid climates or extreme cold. Once we know the extent of conditions, we make sure the project will yield maximum performance.

Our technical staff trains all applicators to ensure top quality projects from surface repair to preparation to spraying.

Products and Processes Match Your Coating Needs

We have a number of coatings which are applied to marine projects. Please visit product pages on our website or call for specifications on these key items:

- HighLine-310 polyurea
- HighLine-410 fade-resistance aliphatic polyurea
- HighLine-510 pure polyurea
- SureGrip soft polyurea
- STS-200 polyurethane
- STS-300 polyurethane
- ArmorShield waterborne polyurea
- ArmorSeal 100 AL polyurea

In addition, ArmorThane has coating products developed to help industries solve a variety of problems. Solutions may include:

- Coat multiple surfaces
- Protect against extreme temperatures
- Resist corrosion and abrasion
- Protect against high wear
- Create a leak-proof barrier
- Improve slip and skid resistance
- Add permanent color coating, signs
- Create a blast-resistant barrier
- Repair and prevent cracks

Your goal is to repair and ensure long-term protection of equipment and structures against abusive elements found in marine settings. Ours is to help you apply the right solutions.

Protecting Your World

ArmorThane is a multi-national company founded by Garry Froese, CEO, in 1989. We have facilities in the U.S. and Canada and export to large dealers around the world.

We specialize in the development, manufacturing and distribution of top-quality protective coatings, as well as the design and fabrication of commercial application equipment. Our products include pure and specially-formulated hybrid polyurea and polyurethane with spray and roll-on applications. We provide low and high-pressure spraying equipment and supplies for fixed locations. Plus, we custom-build mobile coatings units for travel to any project site.

In addition to Marine projects, thousands of applications benefit from ArmorThane's protective coatings. If you would like to know more about specific products and applications, just give us a call.
